

7 April 1962

Mr. George H. Bruce Green
of the CIA,
1200 31st Street, N.W.
Washington, D.C.

Dear Bruce:

I am writing to you with reference to renting a watch repair concession or stall at the forthcoming G.I.A. Building in Langley, Virginia.

My business schedules makes it all too clear that "time is of the essence". One must report to work "on time". One must report to a business meeting or conference "on time". One must meet train or plane departure schedules "on time".

With this same token a good watch mechanic stationed on the G.I.A. premises would save this personnel "time" and steps by rendering this much needed service within a minimum of time and inconvenience. I also realize that only a good watch mechanic could render this much needed service. And with this in mind, I offer our reputation as a recommendation.

Trusting you are in a position to direct me to the person with whom I may discuss this matter further, I remain,

Very truly yours,
Leon R. Fleisher
